

INVOKE AMAZON S3 APIs

*Invoke an Amazon S3 API to GET
and POST to an S3 bucket*

Created by Cadence Daniels

KEY ATTRIBUTES

- `ListS3`: pulls object list from an S3 bucket and creates flow file
- `FetchS3Object`: pulls content from S3 bucket and populates the FlowFile
- `PutS3Object`: Uploads each generated flow file to a specified Amazon S3 bucket

NOTES

- Amazon Simple Storage Service (S3) documentation can be found at:
<https://docs.aws.amazon.com/AmazonS3/latest/dev/Welcome.html>
